marija.belajeva@riga.lv

**Telephone**

+37167105445

**Web page**

www.rdpad.lv

### **II Preferable themes of project and profile of partner**

**1. Brief description on participant’s Organization/Company**

Riga City Council City Development Department is the leading institution in Riga City Municipality in the field of territorial planning, detailed planning and urban development. Department is initiating and implementing projects related to sustainable urban development in conformity with the strategic development plans and needs of residents. The mission of the Department is to ensure balanced development of the City of Riga in accordance with the interests of its residents and companies.

**2. Business sector of participant’s Organization/Company**

Local public authority

### 3. Brief description of the intended project

Our proposed Project – “Remediation of the historically polluted site of Kileveina Ditch (in Riga, Kīleveina grāvis), 1st stage”. The objective of the Project is to clean up the degraded site of the Kileveina Ditch in accordance with the principles of sustainable development, using innovative technologies and methods, thus contributing to 1) the ecological regeneration of the city and the place, 2) the economic development of the territory and 3) the social activation of the city and its surroundings. According to the remediation program and assessment of several possible remediation solutions and methods, it was considered to work based on Dredging and Capping solution.

### 4. The preferable cooperation areas under Open call

We would like to cooperate with potential project partner in field of sustainable remediation solutions of polluted sites (oil and heavy metal contamination), especially regarding Dredging and Capping solution.

### 5. Description of preferable project partner’s profile

We are expecting collaboration with Norwegian local public authority or non-governmental organization which has expertise in project implementation related to sustainable remediation solutions of polluted sites, especially including components of Dredging and Capping solution.

### 6. Please describe what you expect from the potential project partner from Norway

We are expecting the potential project expertise during project initiation phase in 2021 and the final phase in 2023-2024, as well as an exchange of experience, knowledge and best practices in sustainable remediation solutions of polluted sites.

### 7. Please describe what you can offer to potential project partner from Norway

Project budget includes all travel and accommodation costs, as well as organisation of events for the exchange of experience, knowledge and best practices. So the participation will be fully covered by the project budget.

### 8. The information given in this partner search form can be given to the potential partners from Norway for developing partnership

- Yes  
 No
